About Me

Software Developer with 8+ years of experience in backend development, cloud solutions, and DevOps. Skilled in .NET, SQL, AWS with a focus on scalable, high-performing applications. I'm Microsoft Azure certified, proficient with infrastructure as code using Terraform and Kubernetes, and experienced with the full software development lifecycle using Agile methodologies. What I bring to any team is not just technical expertise, but a problem-solving mindset, a commitment to clean code principles, and a collaborative spirit that has allowed me to work effectively across different organizations and team structures.

EXPERIENCE

Capitec Bank, Sandton - *Software Developer*

June 2023 - Current

- Maintaining and migrating legacy systems to the cloud platform by developing new service-oriented applications.
- Migrated on-premises applications to the cloud using AWS (EC2 instances).
- Analyzed and optimized system performance by applying clean code principles.
- Investigated and resolved production issues by identifying root causes and implementing fixes.
- Rewrote applications to microservices using modern technologies to improve scalability and maintainability.
- Tech Stack: .NET Framework, ASP.NET, Java (Spring / Spring Boot), Python, MS SQL Server, DynamoDB, PostgreSQL.
- Cloud & Infrastructure: AWS (EC2, EKS), Terraform.
- DevOps & CI/CD: GitHub Actions, CodeDeploy, Kubernetes, ArgoCD, Helm.
- Messaging & Streaming: Apache Kafka, SQS
- Secrets Management (AWS Secrets Manager / Azure Keyvault / Hashicorp Vault)

Invoke Solutions, Pretoria - *Software Developer*

July 2022 - June 2023

- Developing stack .NetFramework, ASP.NET , SQL Server, Laravel (PHP), Vue.js
- Source control (GIT/Bitbucket/Jenkins)
- Azure DevOps

E4 Strategic, Johannesburg - *Software Developer*

November 2020 - June 2022

- Responsible for maintaining legacy systems and decommissioning by developing new service-oriented applications.
- Analyzing and improving performance on existing systems by using clean code principles.
- Investigate production bugs and apply solutions for bug fixes.
- Developing stack .NetFramework, ASP.NET and MS SQL Server
- Follow agile methodology/Scrum
- Azure DevOps
- Source control (TFS)

Absa, Johannesburg - *Software Developer*

April 2017 - November 2020

My responsibility in ESP(Electronic Sales Platform) project has been very broad including UI development, defining and implementing

- Being involved in all phases of the project lifecycle, planning, analysis, designing, implementation, testing, and maintenance.
- Collaborate closely with a team member to plan, design, and develop user-robust solutions using the.NET Framework , ASP.NET, and MS SQL
- Excellent knowledge of agile and scrum process methodologies.
- MSSQL was used to create SQL Server databases and tables.
- Azure DevOps
- Source control (GIT)

The Digital Academy, Johannesburg - *Internship*

January 2017 - March 2017

The responsibility was to come up with a solution for mobile payment for the first problem statement, and the second solution was to come up with a solution to utilize the beacon technology.

-
- Participated in all phases of the project lifecycle, planning, analysis, designing, implementation, testing, and maintenance.
 - Used to create flowchart, UML, entity relation, UI development to API, and stored procedure creation.
 - Always willing to help fellow teammates and knowledge sharing.
 - Was awarded the best developer of the quarter and we won the best app solution of the quarter
 - Solved both solution using Angular, Ionic PHP and MySQL

EDUCATION

Tshwane University Of Technology - *National Diploma: Information Technology*

2013 - 2016

Kwazamokuhle Secondary School - *Matric Certificate*

2011

CERTIFICATES

Microsoft Certified: Azure Developer Associate

Nov 2022

Skills

- **Backend & Languages:** .NET Framework/.NET Core, C#, JAVA, Spring Boot, ASP.NET, Entity Framework, LINQ, OOP, T-SQL
- **Cloud & Infrastructure:** AWS (EC2, EKS), Azure, Terraform, Kubernetes, Helm
- **Databases:** MS SQL Server, PostgreSQL, DynamoDB, Oracle, MySQL
- **APIs & Integration:** RESTful APIs, SOAP, JSON, XML, Microservices, Kafka, SQS
- **Frontend (supporting skills):** JavaScript (Angular, Vue.js), TypeScript, HTML5, CSS/Bootstrap
- **DevOps & CI/CD:** Azure DevOps, GitHub Actions, Jenkins, ArgoCD, Git, Bitbucket, TFS
- **Practices & Methodologies:** SOLID principles, TDD, Agile/Scrum, Clean Code, Service-Oriented Architecture
- **Observability Tools:** Instana, Prometheus, Grafana, OpenSearch
- **Tools:** Postman, Linux environments

Accomplishments

- Developer of the Quarter at the Digital Academy out of 30 interns.
